

Introduction

A verified peer-to-peer marketplace designed for the Thapar community

ThaparTrade

Buy • Sell • Exchange on Campus

ThaparTrade is a centralized marketplace where verified Thapar users can list, discover and exchange products .within the campus community

Motivation

? Why build a dedicated marketplace for Thapar

Current situation

:Students depend on

WhatsApp groups •

Social media •

Personal contacts •

Scattered listings •

Posts get buried and relevant products are easily missed

What the community needs

:One platform with

Verified users •

Organized categories •

Search & filters •

Direct communication •

A trusted, structured and convenient campus marketplace

Problem Statement

The existing peer-to-peer buying and selling process is fragmented

How can Thapar users safely discover, list and exchange products through one ? trusted platform

01

Scattered listings

Products are spread across groups, chats and personal .networks

02

Poor discoverability

Useful listings can disappear quickly among unrelated .messages

03

Trust concerns

.Buyers need confidence in sellers and product information

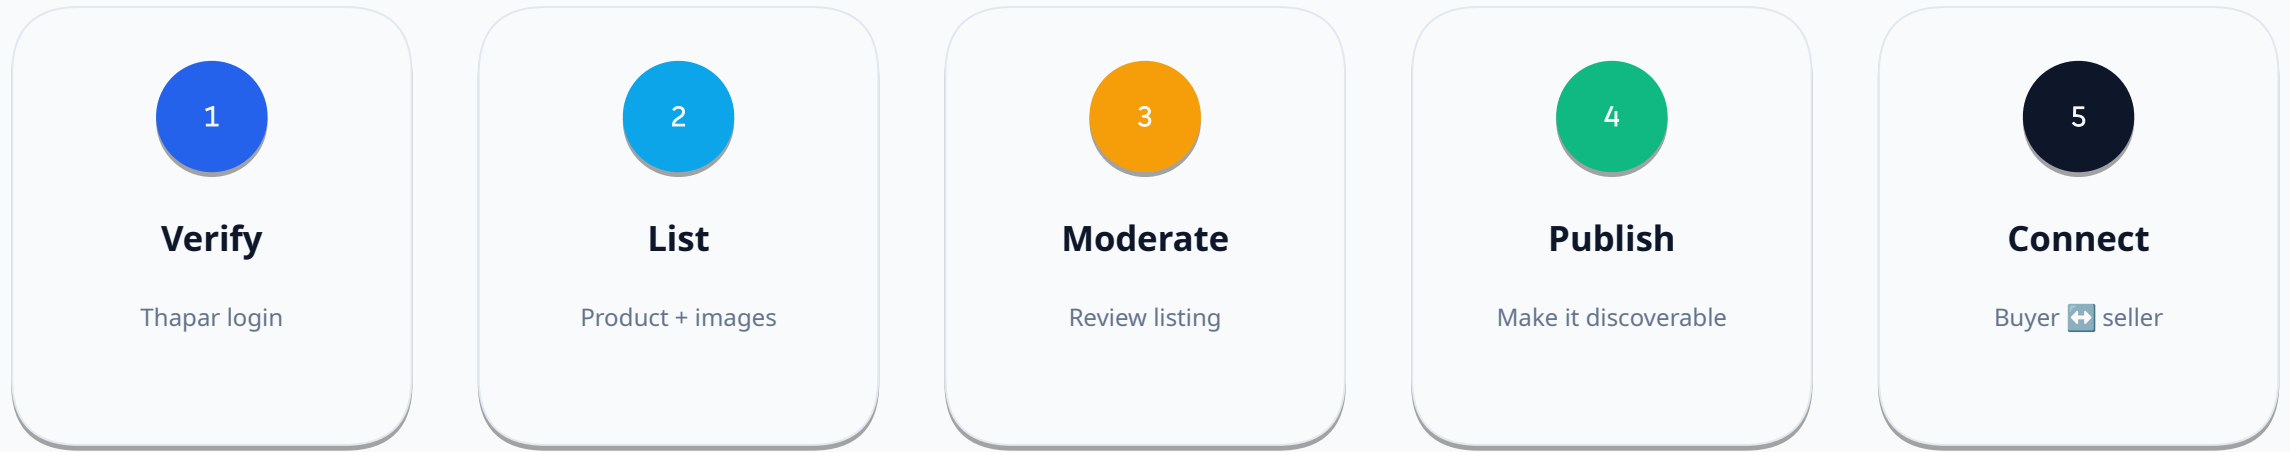

04

Unstructured process

.There is no single workflow for listing, verification and status

Proposed Solution

ThaparTrade — a verified and structured campus marketplace

.Outcome: a trusted, organized marketplace that improves discovery, communication and campus reuse
